*Animal bone constructs for
the 'real bone feel'*

Innovative practice models

Photo manual for reference

Friday 18th & Saturday 19th February 2022

A unique and well-structured course using specially crafted anatomical animal bone constructs to learn and practice hand fracture fixations. The aim is to familiarise and gain confidence in strategy, stabilisation and fixation of all hand fractures.

The two day course will be an enjoyable way of getting to grips with this challenging and less frequented subject through the use of live video demonstrations and innovative animal bone constructs to give the "real bone feel".

Audience: All levels of Plastic Surgery and Orthopaedic trainees and also for those considering a career in these specialties.

Course Fee: £800 Limited spaces Booking: info@surgical-art.com

10% discount offered when you book on more than 1 course & returning candidates

Venue: Liverpool Medical Institution, Liverpool L1
